

**Timo Bongartz**, *General Manager, EMEA*  
Fluence by OSRAM

Timo Bongartz is the general manager for Fluence by OSRAM's EMEA region, empowering growers across Europe, the Middle East and Africa to achieve their cultivation goals. Bongartz also advises Osram's Smart Farming business segment, which he lead prior to his role at Fluence to develop next-generation of sensor and software solutions for greenhouses, vertical farms and across the food supply chain.

Bongartz has extensive experience in project management and business development, serving as a consultant at Deloitte, PMMG Group GmbH as well as Langenscheidt GmbH & Co. KG. Much of his experience has focused on helping businesses transition from legacy processes and technologies to interconnected digital technologies. His experience in helping businesses transform to become faster and more agile entities led him to the horticulture industry to help the global food supply chain become faster, more efficient and more accountable to global food, pharmaceutical and safety standards. Bongartz received his MBA from Hochschule Muenchen and has earned a number of horticulture certificates from Wageningen University and HAS Hogeschool.
